Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	YES
2	README / Setup Guide (instructions to run the project)	YES
3	requirements.txt / package.json / dependency file	YES
4	Database schema / seed files (if applicable)	NA (No database used)
5	Environment configuration file (.env.example or similar)	NA (No API keys or environment variables used)
6	Deployed application URL (if hosted)	No (or Yes if you deploy on Render)
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA (Not a mobile or desktop application)
8	Dockerfile / Containerization config (if applicable)	NA (Unless your faculty specifically asks for Docker)
9	Test files and test results	Yes (Include your model evaluation results)
10	Demo video or walkthrough (if required)	Yes (If required by your faculty)

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

[Paste or describe your folder structure here. Example:]

```

/project-root
/src    - Source code files
/tests  - Test files
/docs   - Documentation
/config - Configuration files
README.md - Setup and run instructions
requirements.txt - Python dependencies (or package.json for Node)
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	
Demo Video Link	

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

[List required software, versions, and system requirements]

Step 1: [e.g., Clone the repository: `git clone <url>`]

Step 2: [e.g., Install dependencies: `pip install -r requirements.txt`] Step

3: [e.g., Configure environment: copy `.env.example` to `.env`] Step 4:

[e.g., Run database migrations: `python manage.py migrate`] Step 5:

[e.g., Start the application: `python manage.py runserver`] Step 6:

[e.g., Open browser at `http://localhost:8000`]

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
